JVC®

JVC Color TV Family Theater Catalog 2001

For years JVC customers have come to expect two things from our products ~ outstanding quality, and performance that is unsurpassed by our competitors. To meet such lofty expectations year after year we at JVC always stay abreast of the latest technologies, incorporate them into our lineup, and at the same time, never compromise our unmatched quality standards.

The Year 2001 is no exception for JVC ~ this year our customers can expect every TV to be filled with more great features than ever before, and to outperform our rivals yet again.

To make our core line stronger than ever we decided to improve both our picture quality and add user convenience features to every model. Central to improved picture quality is the new 3 Line Digital Comb Filter on all 27, 32 and 36 inch models, and a dark tinted CRT on all models, from sizes 13 and up. Key convenience features this year include our new universal remote that now controls most brands of DVD players as well as VCRs and cable boxes, the addition of Hyper Scan, our famous high speed channel changer in all regular models, and the addition of a DVD component input on all 30 and 60 Series models.

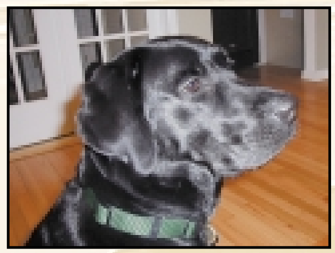

If you have come to expect the best from JVC, we guarantee that you will be equally impressed with all we have to offer our customers this year as well.

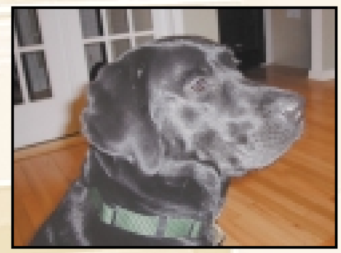

Picture Features

At JVC we can proudly say that our picture quality is the best. This is true because we take pride in each and every model we develop and for that reason we include 3 key video features ~ Black Level Expansion, Apacon, and a Dark Tinted Picture Tube. Larger screen models now include a 3 Line Digital Comb Filter as well. All these features combined insure our picture will be the best…

BLACK LEVEL EXPANSION

JVC's exclusive Black Level Expansion technology creates dark, rich blacks so that colors become deeper and more vivid. Our chassis designs also make for brilliant whites and a dynamic high contrast picture. Compare the sharp detail and outstanding black colors of the dog in the JVC picture to the ordinary picture.

JVC Picture

Ordinary Picture

DARK TINTED PICTURE TUBE

Another element that insures outstanding picture quality in our TVs is the Dark Tinted CRT. All of our Dark Tinted CRTs create much greater contrast between darks and lights over standard CRTs. These CRTs also increase the depth of the black and dark colors on the screen to really make the colors "pop". (Not available on the 13 inch TV/VCR combos.)

APACON

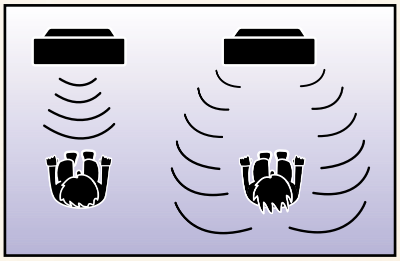

Apacon is another JVC feature that helps insure that every JVC TV has the exceptional picture quality for which we are known. Apacon is a circuit that enhances picture sharpness by sharpening the transitions between dark and bright, by adding preshoot and overshoot, and by speeding up the transition. Apacon makes sure details are enhanced so that the picture is always crisp and sharp.

3 LINE DIGITAL COMB FILTER

New to the 30 and 60 Series this year is a 3 Line Digital Comb Filter. This Comb Filter provides a sharper overall picture and smoother graphics. Also, text blocks in programs such as sport scores and news casts look better because the Comb Filter corrects hanging dots, color bleeding, and cross color interference.

Sound Features

Superior sound is another feature that makes JVC TVs better than the rest. At JVC, we have designed many sound benefits into our core TV line. Whether you listen to the TV's own speakers, or, for stereo models, connect to a HiFi or surround sound system, all JVC TVs sound great.

Normal Sound Hyper Surround Sound

HYPER SURROUND SOUND

A JVC exclusive feature, Hyper Surround Sound creates the impression of a 3-dimensional soundfield using the TV's front firing speakers. Hyper Surround electronically processes stereo audio signals by manipulating the phase relationships and frequency response for a fuller, richer 3-D effect. With Hyper Surround, it sounds like you are right in the middle of the action without the need for extra rear speakers.

MTS Stereo Sound with SAP

Every JVC stereo television has high performance MTS for superb stereo sound. Whether you use the TV’s already superior sound system, or connect the TV to a multi-channel sound system, it is guaranteed to sound great.

FRONT FIRING SPEAKERS

For richer, fuller sound, all JVC TVs are designed with front firing speakers. Because the speakers are aimed directly at the viewer, a rich, clear sound stream is created that enhances both music soundtracks and dialog.

Convenience Features

Another way we at JVC make our TVs so competitive is by packing them with all of the latest inputs and menu options. Our customers are sure they can connect any and all of their components to one of our TVs.

DVD COMPONENT INPUT

New to this year's core line is a DVD Component Input on all 30 and 60 Series sets. Our DVD Component Input (Y, PB, PR compatible) ensures that when people buy a JVC TV, 27 inch or above, they know that it will be compatible with current DVD players, satellite systems, and future set top boxes.*

AV COMPU LINK EX / HOME THEATER COMPONENT SERIES

JVC's AV COMPU LINK EX lets select model TVs accept commands from select JVC receiver remote controls, making the TV the heart of the JVC home entertainment system. Simply insert a pre-recorded videotape into your AV COMPU LINK VCR, or a disc into the COMPU LINK DVD player, and the receiver will select the proper EQ settings, surround mode, and inputs — everything, even the TV, turns on automatically!**

VARIABLE AUDIO OUTPUT

Every stereo model in our core line comes with a Variable Audio Output. Connecting your home theater to the TV's Variable Audio Output lets you adjust the speaker volume by using your TV remote.

TV SPEAKER ON / OFF IN MENU

Most JVC stereo televisions allow you to switch the TV’s speakers to off when you want to listen to a multi-channel AV receiver sound system. Just as easily, you can switch the speakers back on when you just want to watch the news.

PLUG IN MENU

A feature of true convenience, the Plug In Menu lets you set up what will become your own default menu options. The first time you turn on your TV, the Plug In Menu prompts you to choose the language for the onscreen menus, begin the auto tuner setup so you can scan all channels, and set the clock.

Standard Features

Every JVC TV comes equipped with a core package of great features.

CHANNEL GUARD and **V-CHIP** lock out “unauthorized” viewers from specific channels and entire time slots.

XDS AUTO CLOCK SET makes setting the clock simpler than ever.

The **MULTI-FUNCTION TIMER** can make it seem like you’re home watching TV when you’re really not. Or, it can be set to remind you when a favorite program comes on or to wake you up in the morning.

The **SLEEP TIMER** will turn the TV off after a specified amount of time (up to 180 minutes) so you can fall asleep to your favorite show.

AUTO TUNER SETUP activates all of the current, active channels so you can scan sequentially without noise or video snow. The simple JVC onscreen menus allow users to easily add or delete channels manually too.

NOISE MUTING places a placid blue screen in the space of channels receiving loud, noisy static (not available on TV-13142/W and TV-20F242).

CLOSED CAPTION DECODER w/FULL TEXT MODE decodes any captions or other text information that is included in a program such as second audio programming.

The **DISPLAY** shows the status of the TV timers and inputs with a press of the button, or, if you prefer, it can continuously display the time or channel so you always know!

JVC's **VIDEO STATUS MEMORY** lets you select the most desirable picture settings for your unique lighting so you can easily access your "Choice" with the press of a button.

TRI-LINGUAL MENUS let you choose the language, English, French or Spanish, for the onsrceen menus and displays.

GAME MODE (select models) optimizes the TV’s color setup best for video game play.

RETURN+ lets you return to a channel via the 10 key pad with regular return, or program a "Return Channel" to be returned to after sequentially scanning the channels (not available on TV-13142/W and TV-20F242).

Combo Features Features

EZ JECT is our exclusive rental tape return feature ~ use it and no more fees for not rewinding!

SQPB (S-VHS Quasi-playback) lets you watch otherwise incompatible S-VHS tapes.

PROCISION 19µ VCR TECHNOLOGY provides superior picture quality by eliminating picture anomolies such as ghosts, color beats and crosstalk. It also boosts EP pictures to near SP levels!

VCR PLUS+ makes recording your favorite programs simple by allowing you to utilize the program codes in your local TV Guide.***

SKIP SEARCH advances the tape 30 seconds for each press of the button to help weed out the commercials.

INDEX SEARCH, a JVC exclusive feature, automatically marks the tape with an index point so that you can easily cue or review to the beginning of a program you prerecorded.

AUTO TRACKING insures the best possible picture from any tape by automatically adjusting the horizontal and vertical stabilization.

AUTO SP➡EP TIMER RECORDING insures that the tape will not run out when you are recording in SP mode by automatically switching over to EP mode when more space is needed to finish your recording.

Technology Features

Super Command is the foundation for every JVC TV. Our menus are brightly colored with brilliant contrast to make them pleasant to look at and easy to read. Each JVC menu system is easy to operate too — directional arrows in the OSD and on the remotes make selecting options easy and intuitive ~ using the remote control's 4-way cursor command operation, all of the features of JVC's menu systems are as simple as up, down, left, and right.

15 COLOR ICON BASED OSD

Select models feature an advanced version of our regular Super Command menu, the 15 Color Icon Based Menu. Utilizing the same scrolling technology and 4-way cursor control, this menu system is bright and attractive making it even more pleasant to use. Also, the "helping hand", menu page title bars and key feature icons help make it even more easy to use. We truly believe ours is the nicest menu in the industry.

UNIVERSAL REMOTE CONTROL W/DVD CONTROL CAPABILITY

This year every JVC universal remote control is preprogrammed with the IR codes for today's most popular brands of DVD players, VCRs, satellite dishes and cable boxes. This stylishly designed remote puts all the right buttons in just the right spots to make operating your TV or other home theater component as easy as possible.

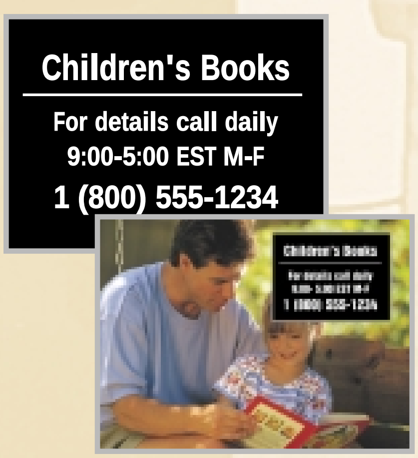

As in the recent past, all JVC remotes still come with a TV/VCR button that allows customers to seamlessly switch their VCR between TV and VCR modes.****

UNIFIED REMOTE CONTROL FOR TV AND JVC VCR OPERATION

Our mono model televisions come equipped with a Super Command TV/VCR unified remote control. With this remote customers can operate all the great features of the TV and the basic functions of their JVC VCR as well.

Picture In Picture

JVC PIP is the finest in the industry — it's simple to use and the picture is bright as can be. Also, all our PIP model TVs have two tuners built-in to eliminate complicated and aggravating hookups. PIP is feature filled …

DUAL TUNER PIP

JVC's PIP has 15% more pixels than the average industry PIP and is crisp, clear, and versatile. With two tuners built right into the set, you can see two programs at once, or with another video input hooked up, a video and TV. JVC PIP also lets you SWAP the PIP program with the main program, and MOVE it to any corner of the screen.

FREEZE JVC PIP also lets you FREEZE a picture in the main screen so you can catch an important phone number, address or just a funny expression. If PIP is already activated, you can FREEZE the PIP screen.

MULTI-FUNCTION TIMER PREVIEW … JVC PIP models utilize the PIP screen in a unique way. Combining PIP technology and our exclusive Multi-function Timer, JVC PIP models offer a Timer Preview Window. This feature provides a 7 second preview in the PIP screen just before the TV changes to the program you previously timed with the Multi-function Timer.

60 Series

The year 2001 is probably the most aggressive in recent years for JVC television products. The Series made the strongest this year is our new expanded 60 Series lineup.

The 60 Series models each come packed with all of our standard AV features, plus Dual Tuner PIP and a new 3 Line Digital Comb Filter for a sharper picture. And, to make our customers lives even easier, each model in this line comes with the Plug In Menu and a new Universal Remote Control with TV/VCR/Cable Box and DVD control capability.

Another area greatly enhanced this year is the inputs. All 60 Series models come very well equipped with a DVD Component Input, an S-Video Input, dual rear AV Inputs with a third Front AV Input, and of course, an audio output.

AV-36260

Key Features

- 36" Diagonal Full Square Dark Tinted Picture Tube
- Dual Tuner PIP
- 3 Line Digital Comb Filter
- 800 Lines Horizontal Resolution

30 Series

For the customer who desires a larger screen TV but is not concerned with Dual Tuner PIP, the 30 Series is decidedly the answer.

Like the 60 Series models, the 30 Series models all come with our standard AV features, plus the new 3 Line Digital Comb Filter, the Plug In Menu (32" and 36") for ease of use, and the new Universal Remote Control with TV/VCR/Cable Box and DVD control capability.

We remain equally aggressive as the 60 Series with our 30 Series models inputs ~ each model comes with a DVD Component Input, an S-Video Input, dual rear AV Inputs with a third Front AV Input, and an audio output.

TV/VCR Combos

Whether you want your TV/VCR combo for the kitchen, your bedroom, or the kids playroom, JVC has a combo to fit your needs. And, no matter what room you specifically buy it for, any of our combos is portable enough to move from room to room depending on where you want your viewers to be.

This year our Combo family has grown to four units. Added to our 20 inch line this year is a new pure flat screen model with MTS stereo TV and 4 head HiFi VCR technology. Both this new and our regular 20 inch combo come with all the JVC features you've grown to love, including our very own EZ JECT rental tape return feature, SQPB quasi S-VHS playback, and a host of other great features that make your video tape library easy to enjoy.

Back and as nice as ever at a new even more affordable price are our two 13 inch models, one in black and one in our own appliance white.

TV-20F242
